

NAMIBIA CONSUMER PRICE INDEX BULLETIN

AUGUST 2013

Forth coming issue	Expected release date
September 2013	10 October 2013

MISSION STATEMENT

In a coordinated manner we produce and disseminate relevant, quality and timely statistics that are fit-for-purpose in accordance with international standards and best practice

VISION STATEMENT

Be a high performance institution in statistics delivery

CORE VALUES

Performance
Integrity
Service focus
Transparency
Accuracy
Partnership

PREFACE

The Namibia Consumer Price Index (NCPI) includes all expenditures on goods and services made by Namibian private households in urban and rural areas, and is compiled by comparing the prices of the goods and services of the month under review with the prices prevailing in December 2001. More than 7,000 prices quotations for goods and services are collected monthly from about 650 retail outlets in 8 localities.

The item indices are calculated as unweighted geometric averages of price ratios while the higher-level indices are calculated as weighted arithmetic averages of the item indices by using chained Laspeyres index number formulae. The NCPI weights represent the expenditure share of each commodity in the 1993-94 Namibia Household Income and Expenditure Survey. The Namibia Consumer Price Index is published about 15 days after the end of the reference month to which it relates.

The NCPI is used as the basis to calculate the rate of inflation as experienced by households in their role as consumers. The inflation rate measures the change in the NCPI of the month under review to the previous month (month-on-month change) or to the same month in the previous year (year-on-year change). The NCPI and the inflation rate have become key figures for purposes of economic policy-making, especially the conduct of monetary policy.

The inflation rate is often used in a wide variety of private contracts for the purpose of adjusting payments (such as wages, rents, interest and social security benefits). It can, therefore, have substantial and wide-ranging financial implications for governments and businesses, as well as for households.

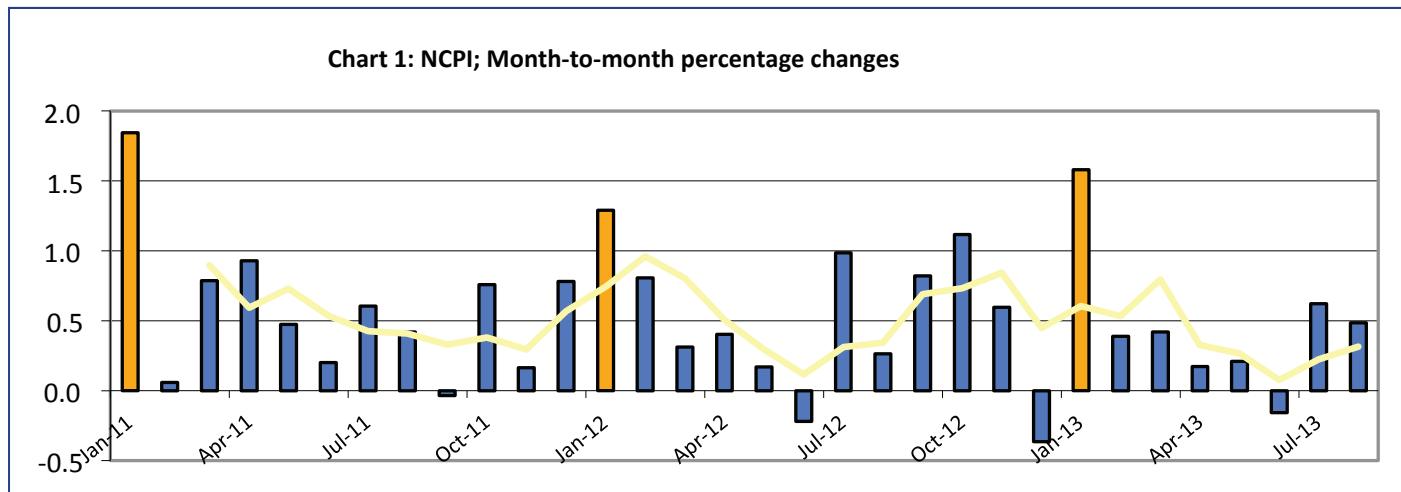

.....
John Steytler
STATISTICIAN – GENERAL

SUMMARY COMMENTS

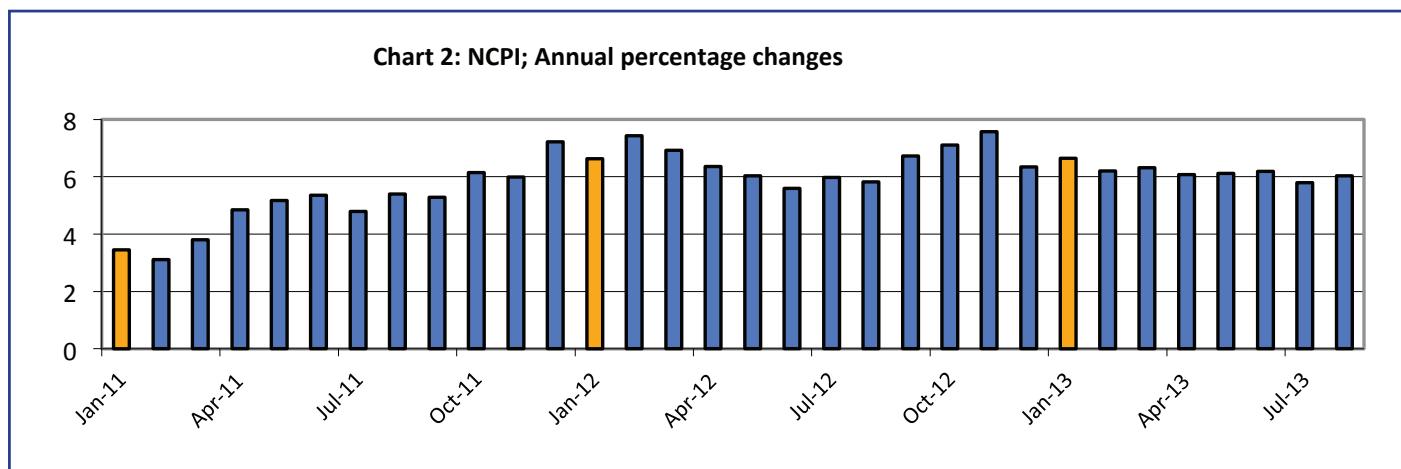

The All Items Index for August 2013 increased by 1.0 percentage points from 204.4 recorded in July to 205.4. This increase resulted in a monthly inflation rate of 0.5 per cent as compared to 0.6 percent recorded in July.

The increase based on the All Items Index for August 2013 was due to increases recorded in all the groups comprising the NCPI with the exception of Health and Recreation and Culture which showed decreases of 0.1 percent and 0.2 percent, respectively.

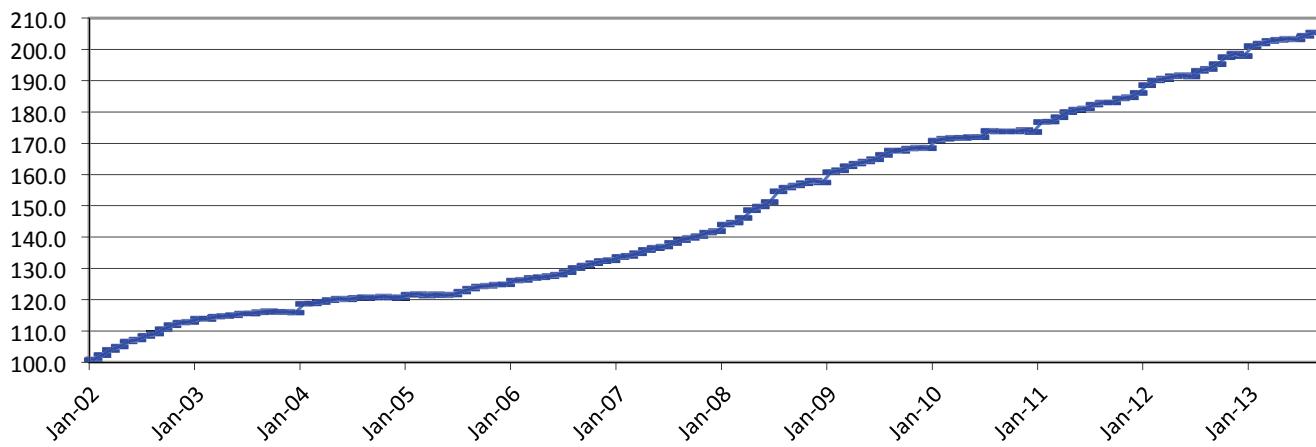

The annual inflation rate for August 2013 was estimated at 6.0 percent while the corresponding rate recorded during the same period last year was 5.8 percent.

The increase in the annual inflation rate was caused by an increase in the prices of Food and Non-Alcoholic Beverages (6.7 percent), Housing, Water, Electricity, Gas and Other Fuels (7.8 percent), Transport (6.8 percent) and Hotels and Cafes and Restaurants (9.0 percent).

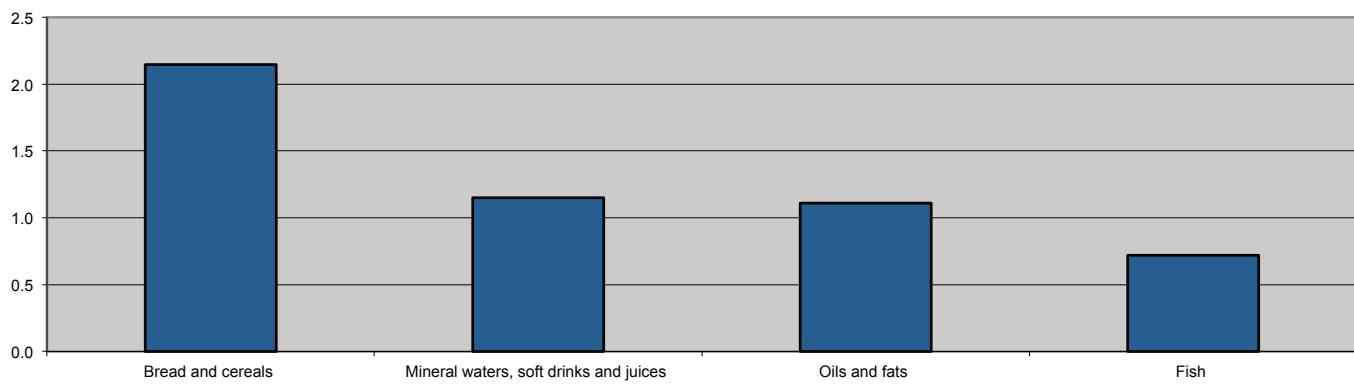

The All Items Index since December 2001 (base month) to August 2013 increased from 100 to 205.4 which show that prices of goods and services comprising the NCPI have more than doubled during the indicated period as illustrated by chart 3 below.

Chart 3: NCPI, Percentage changes from Dec. 2001

The index for Food and Non Alcoholic Beverages rose from 240.6 recorded in July 2013 to 241.6 in August 2013 resulting in a monthly increase of 1.0 percentage points. The August increase in the Food and Non-Alcoholic Beverages Index was caused by rising prices in the categories of Bread and cereals (2.1 percent), Mineral water, soft drinks and juices (1.2 percent), Oils and fats (1.1 percent), and Fish (0.7 percent).

Chart 4: NCPI Food items with higher monthly price increases (August 2013)

The Goods annual inflation rates trends followed those for Services hovering between 3.9 and 6.5 percent. The monthly and annual inflation rates for Goods were estimated at 0.6 and 4.5 percent as compared to those for Services which stood at 0.3 and 8.6 per cent respectively.

The increase in prices for Services was due to increases in prices recorded in the subcomponents of: Public transportation services (0.4 percent) Repair charges of footwear (3.4 percent) and Dry cleaning, repair and hire of clothing (0.7 percent).

The annual inflation rates for the major groups comprising the Namibia CPI recorded in August were Food and Non alcoholic beverages 6.7 percent, Housing, water, electricity, gas and other fuels 7.8 percent and Transport 6.8 per cent. The corresponding rates registered during the same period last year were 7.3, 7.4 and 6.0 per cent respectively.

The average monthly and average annual inflation rates for the period January to August 2013 stood at 0.5 and 6.4 per cent as compared to 0.5 and 6.2 per cent estimated during the same period last year.

The detailed results of the Namibia CPI for the month of August 2013 are displayed in Tables 1-10 and in Charts 1-7 respectively on the following pages.
