# NAMIBIA CONSUMER PRICE INDEX BULLETIN

**DECEMBER 2012** 

Forth coming issue	Expected release date
January 2013	13 February 2013

### **PREFACE**

The Namibia Consumer Price Index (CPI) includes all Namibian private households living in urban and rural areas and is compiled by comparing the prices of the goods and services with the prices prevailing in December 2001. It measures the rate at which the prices of consumer goods and services are changing from time to time. The prices are collected from more than 650 retail outlets in 8 localities.

The index is calculated as a weighted arithmetic average of the proportionate changes in the prices of goods and services in the basket, with the weights representing the expenditure shares on each commodity in the 1993-94 Namibia Household Income and Expenditure Survey. The index is published about 15 days after the end of the reference month to which it relates.

The CPI is widely used as a measure of the rate of inflation as experienced by households in their role as consumers. The CPI has become a key statistic for purposes of economic policy-making, especially the conduct of monetary policy.

It is often specified in legislation and in a wide variety of private contracts for the purposes of adjusting payments (such as wages, rents, interest and social security benefits) for the effects of inflation. It can, therefore, have substantial and wide-ranging financial implications for governments and businesses, as well as for households.

John Steytler

STATISTICIAN - GENERAL

### **SUMMARY COMMENTS**

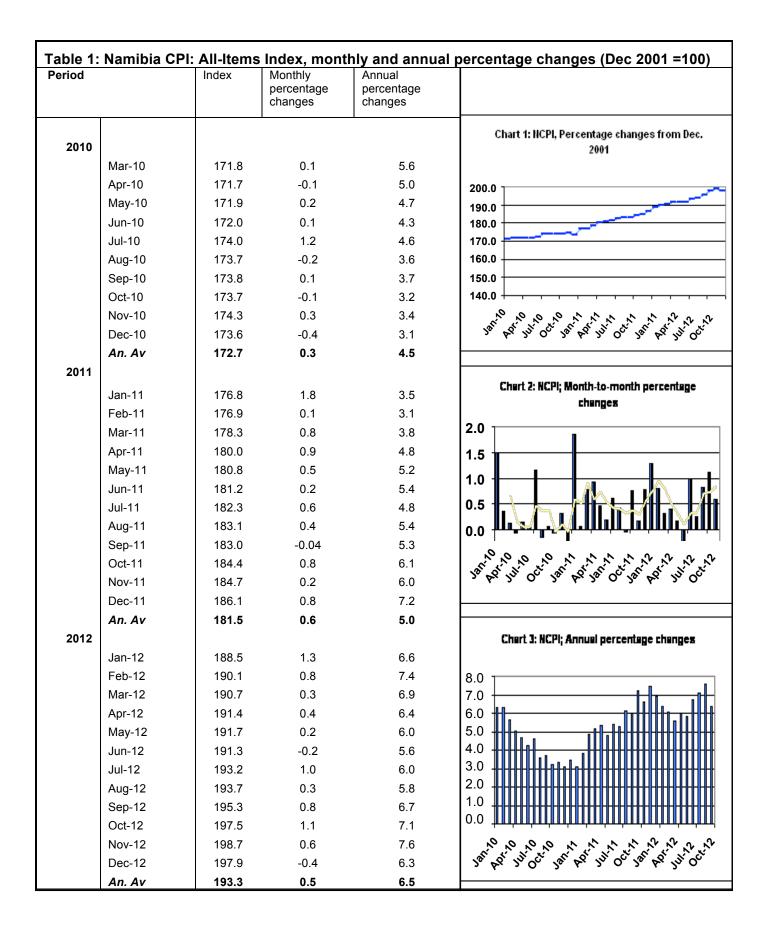

The monthly inflation rate for December 2012 was estimated at -0.4 percent, as compared to the November 2012 rate of 0.6 percent a decline of 1.0, percentage points. This decrease resulted from monthly declines recorded in the groups of Food and Non- alcoholic beverages; Alcoholic beverages and tobacco; Health and Recreation and culture.

The All Items Index for December decreased by 0.8 percentage points down from 198.7 recorded in November to 197.9.

The index for Food and Non alcoholic beverages for December 2012 dropped to 235.5 from 238.2 recorded in November 2012 registering a monthly decrease of about 2.7 percentage points. This fall was due to declines recorded in all the subgroups comprising the Food and Non alcoholic beverages group with the exception Fruits; Oils and fats and Fish which recorded increases of 2.2, 0.5 and 0.4 percent respectively.

The average monthly and average annual inflation rate for the year 2012 were estimated as 0.5 and 6.5 percent while the corresponding rates of the year 2011 stood at 0.6 and 5.0 percent respectively. The annual inflation rate for December 2012 stood at 6.3 percent as compared to 7.2 percent recorded during the same period last year. The major groups comprising the Namibia CPI annual inflation rates were Food and Non alcoholic beverages (8.2 percent), Housing, water, electricity, gas and other fuels (7.6 percent) and Transport (5.8 percent).

The detailed results of the Namibia CPI for the month of December 2012 are displayed in the Tables 1-5 and in Charts 1-5 respectively.
